

MEDICATION TRAVEL BAG

Setting the Combination Lock

Your Medication Travel Bag has been set with a default security code of (0-0-0) from the factory. You may keep this code, however, for added security, we recommend that you re-set the combination using 3-digits of your choosing by using the following instructions:

- Step #1** Push the right-side slide button out to open the lock.
- Step #2** While open, rotate the number wheels to your desired combination.
- Step #3** Release the slide button, and your new code is set.

Please be aware that every time you open the lock, the numbers can change the combination. So please be conscious of the number wheels when unlocked.

Locking your Travel Bag

- Step #1** Turn the numbered dials to your preset combination.
- Step #2** Insert the top of each zipper into the locking mechanism. You will hear a snap each time you insert the zipper properly into the locking mechanism.
- Step #3** Turn the numbered dials around to a random combination and you will have locked the Travel Bag successfully.

Un-Locking your Travel Bag

- Step #1** Turn the numbered dials to your preset combination.
- Step #2** Press down the release button. You will hear a snap releasing both zippers and you will have opened the locking mechanism successfully.

Make a note of your personal combination and keep it at a safe place!
